Euan Ripper

Robotics & mechatronics student · full-stack developer · Python, TypeScript, Svelte, CAD

euanripper2@gmail.com | euans.life | github.com/edRipper | linkedin.com/in/euan-ripper

Robotics and mechatronics student at Loughborough and a web developer and event organiser for Hack Club, focused on energy resilience and sustainability after growing up on a sustainable farm in rural Devon.

EXPERIENCE

Hack Club - Programme lead & web developer
United States, 2024 - present

- Won a $50,000 fellowship after two interviews and a portfolio review, one of a small group running Hack Club's funding programmes from its US headquarters; deferred a Loughborough place to take it.
- Led communications for Summer of Making, a global programme with GitHub that shipped over 5,000 physical prizes to teenagers building technical projects.
- Designed and built Beest, a full-stack web platform, from scratch; over 4,000 verified students built projects, received feedback and earned prizes.
- Modelled a Strandbeest linkage in CAD and organised the trip that took the top 30 Beest builders to the Netherlands to meet Theo Jansen, one of Hack Club's first European events (attendee net promoter score 94).
- Ran programmes generating over 10,000 hours of independently verified student work; managed $100k+ budgets, logistics and event safety for thousands of users.
- Ran a responsible security disclosure end to end: patched a reported email-exposure bug, notified all 25 affected users and open-sourced the platform.

North Devon robotics club - Founder & team lead
Devon, 2023 - 2024

- Grew a self-started robotics club from zero to 15 regular members, teaching engineering fundamentals and mentoring a competition team.
- Led the team to win the North Devon Robotics Challenge 2024 against far better-funded private schools; credited as team lead in an IET article.

EDUCATION

Loughborough University
Loughborough, 2025 - present

Mechatronics, robotics & control engineering

A-Levels - Mathematics, Physics, Computer Science
Queen Elizabeth's, 2025

GCSEs
Queen Elizabeth's, 2023

Ten GCSEs grades 6-9 plus a Level 2 Further Mathematics certificate, including grade 9 in Computer Science, Physics, Design & Technology and English Language.

LEADERSHIP & TEAMWORK

Ten Tors 2025 - Team leader
Dartmoor, May 2025

- Led a mixed team of six through the 55-mile endurance challenge in 33 hours despite record heat-stroke dropouts; made safety calls in a heatwave and kept the team moving. Won the academy trust's student teamwork award.

European Parliament Ambassador Scheme
Strasbourg, 2024

- Gave a talk to thousands of multinational students on the dangers of AI deepfakes at the European Parliament.

Deputy head boy & event organiser
Queen Elizabeth's, 2024

- Chaired student council, launched a second-hand uniform shop and led a coding club teaching JavaScript.

INTERESTS

- Endurance and balance sports: unicycling, off-road ultramarathons (50k) and rollerblading.
- Personal builds: designed and built a walking Strandbeest; currently hacking a thermal printer to print live photos from a Pi Camera.
